DETAILED ACTION

Allowable Subject Matter

1. Claims 9-13, 15, 16, and 18-20 (renumbered 1-10) are allowed. The following is an examiner's statement of reasons for allowance: Hosoya (JP 2001-310604) is seen to constitute the closest prior art of record. As best depicted in Figure 3, Hosoya teaches a pneumatic tire construction including a pair of belt plies 20 A and 20 B and a belt cover ply or structure, wherein said structure is defined by a main belt cover section 22B disposed radially outwardly of said belt plies and a pair of belt cover extension sections 22A disposed radially inwardly of said main belt cover section. It is further evident from Figure 3 that the axially inner ends of said belt cover extension sections are positioned radially inward of the outermost belt ply 20B. In this instance, however, the reference fails to suggest, disclose, or teach a tire having the above noted construction in combination with a crown assembly including a wing chip rubber layer, a base tread layer, and a cap tread layer and having the claimed dimensional arrangement.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
